- > Limit call costs with toll restrictions and long conversation cut-off
- > Lock handsets to prevent unauthorised use
- > Ready for connection to the NBN

Keeping your team connected

Internal Sales Person

"The Auto-Attendant feature means that callers receive a greeting and are routed to the correct department, ensuring that I only get the calls that are meant for me."

Receptionist

"With Caller ID on my handset, I can give the appropriate greeting to callers and redirect calls from familiar numbers, straight to the relevant colleague."

The lights on my handset enable me to view the call status of each colleague, preventing me from wasting time trying to contact somebody who is busy on a call."

IT Manager

"It's easier than ever to manage our system settings. Drag-and-drop functionality provides an error free way of building call groups, which is useful for when employees move desks, leave or join the company."

Team Manager

"I know my team will have the communications tools they need to be responsive to our customer's needs from any location."

Office Worker

"The conference feature allows me to effortlessly set up a virtual meeting for colleagues at short notice, wherever they are. This enables faster business decision-making, as well as saving travelling time and expenses."

Remote / Home Office Worker

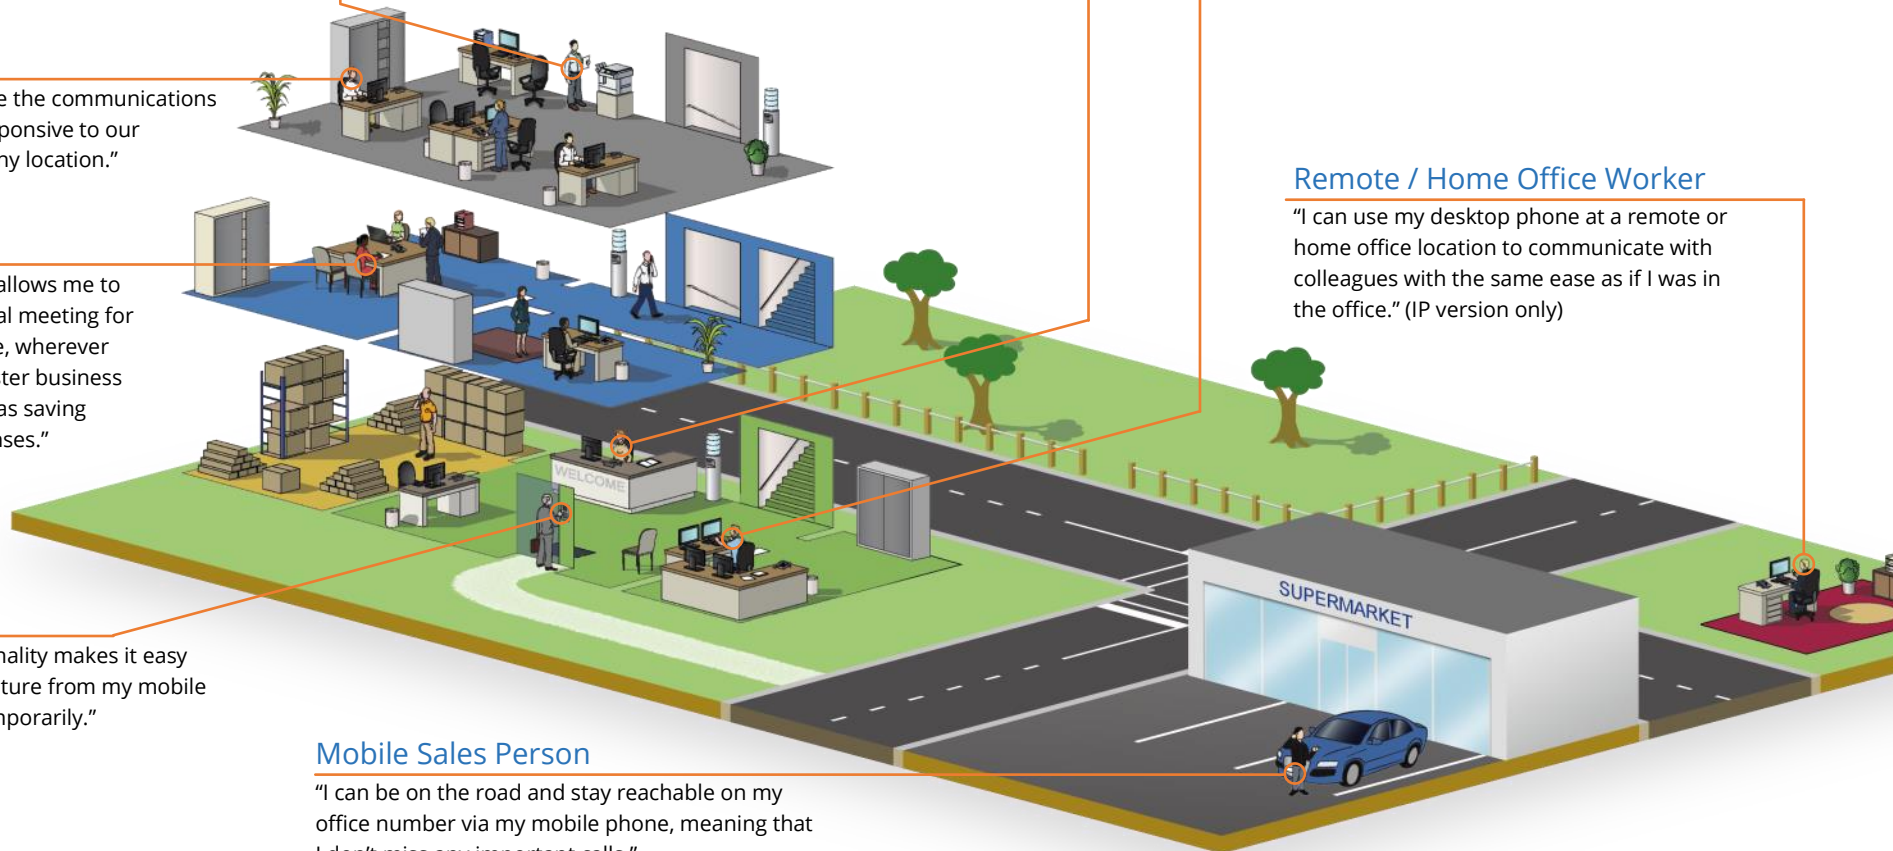

"I can use my desktop phone at a remote or home office location to communicate with colleagues with the same ease as if I was in the office." (IP version only)

Security Guard

"The door-phone functionality makes it easy for me to operate the feature from my mobile if I need to go off-site temporarily."

Mobile Sales Person

"I can be on the road and stay reachable on my office number via my mobile phone, meaning that I don't miss any important calls."

Improving your business

Screen visitors to your business

SL1100's door phone integration, gives you the added security of being able to screen visitors to your premises.

When a visitor presses the button on the door phone it will ring any extension, or group of extensions. The person answering the call can speak to the visitor and release your door lock to allow them entry.

Built-in alarm sensor support

The SL1100 comes with built-in Alarm Sensor Support when connected to a 3rd Party Passive Infrared Sensor (PIR) or motion detectors. This offers additional security protection, and warns the intruders when there is a forced break-in. A pre-recorded warning message can be played back through the built in speaker of the telephone or a paging speaker as a siren, triggered by the PIR sensors.

Stay connected while on the move

With Mobile Extension, you can take your office number with you when you're on the road. It provides you access to system features such as call transfer and voicemail, and it really is like being in the office, whether you're travelling, or sitting in traffic.

Company specialists can now be empowered to maintain high service standards when out of the office, helping you to take advantage of the most valuable members of your staff.

Salespeople can use Mobile Extension to ensure that even when they're on the road, they never miss a call which could lead to a lucrative business opportunity.

More than voicemail

The SL1100 offers more than just a regular voicemail box. Packed with powerful business features, this is a solution to make keeping up to date easier than ever.

Callers can be presented one of three personalised greetings that you can select depending on your availability or the time of day.

With Message Notification to your desktop phone, home office or mobile phone, you can monitor your mailbox effortlessly from wherever you are. You can even choose to receive email notifications with the message included as an audio attachment.

By using the Call Record feature, you can keep track of important discussions. Recordings can be emailed to colleagues and stored for quick reference at a later time.

NEC's SL Desktop Suite enhances your organisation's productivity and collaboration by tightly integrating your desk phone and your PC.

Manage communications from your Desktop PC

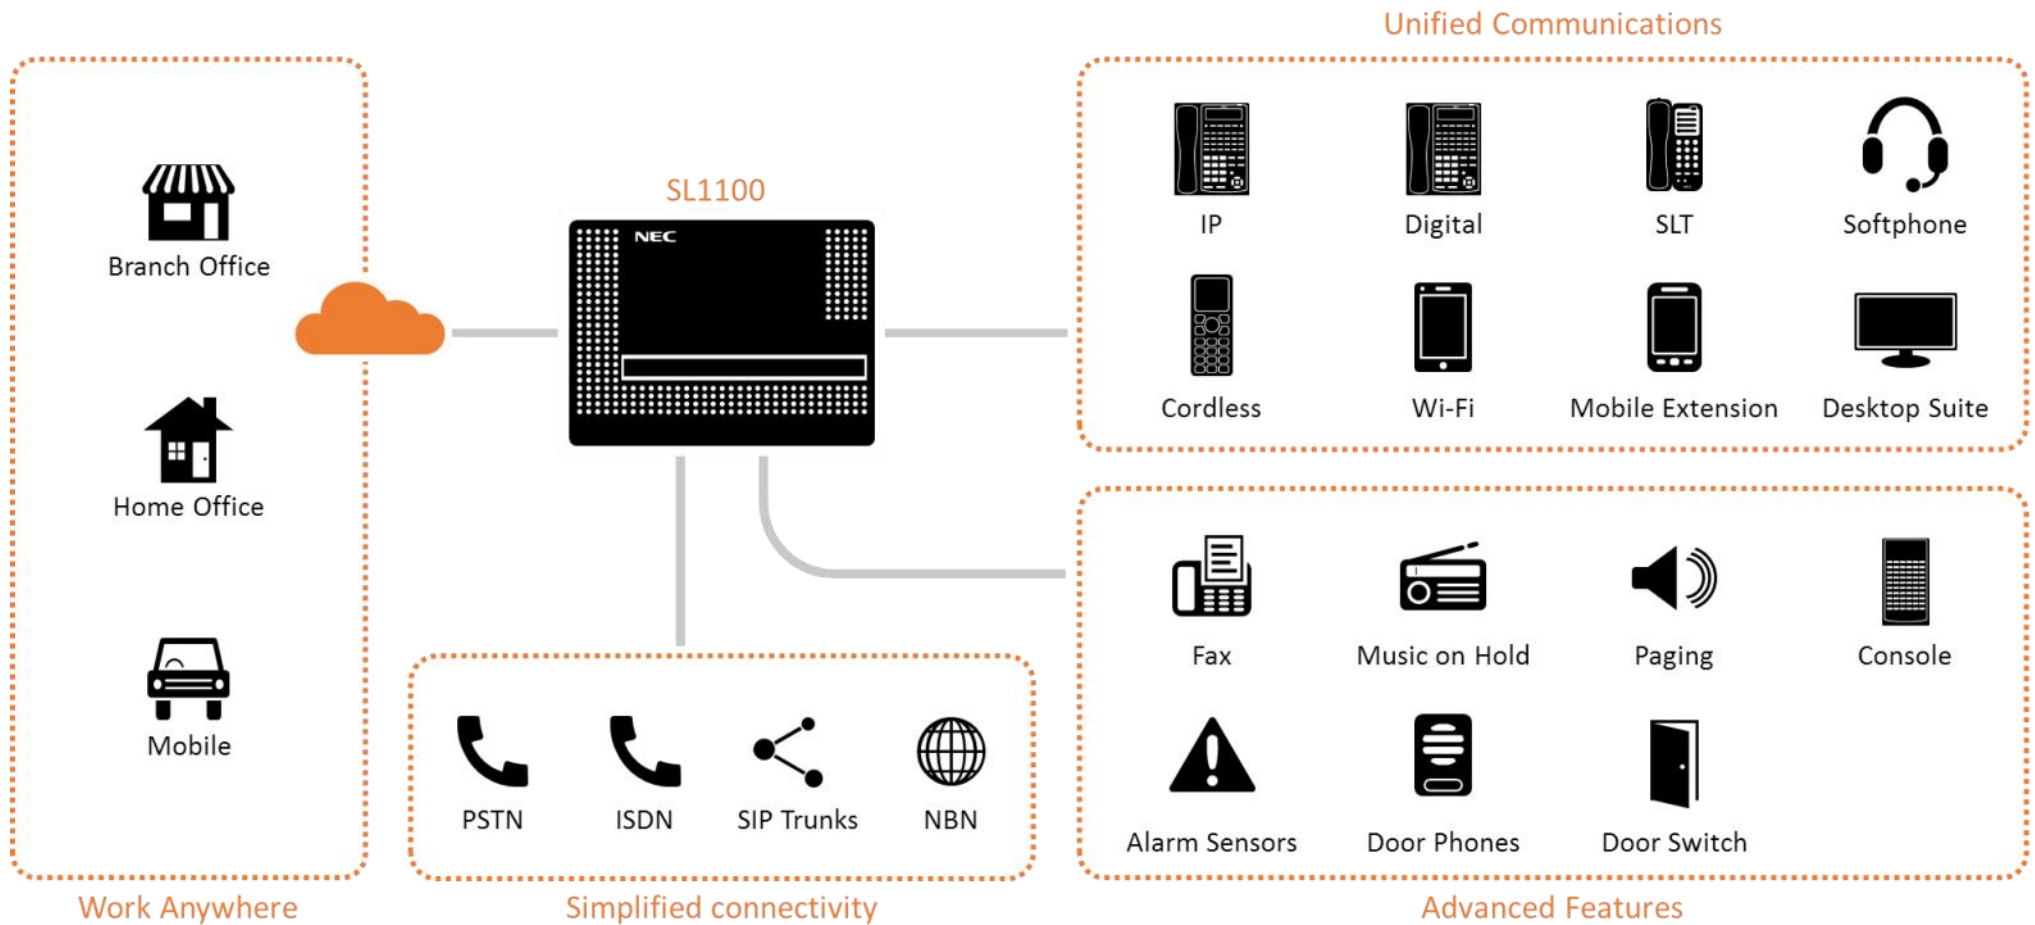

The SL Desktop Suite's Desktop Client is an intuitive application providing full call control from your PC screen. With just a few clicks of your mouse, you can get more done in less time through SL Desktop Client's easy-to-use features such as click-to-dial (from any application), speed dialling, call management, sending calls to voicemail and contact lookup.

For Microsoft® Office Outlook® users, it easily integrates with your Outlook contacts, providing click-to-dial and transfer functionality.

Work remotely

The SL Desktop Suite's Softphone delivers desk phone functionality from your laptop, from wherever you are; ideal for remote and mobile workers. With the Softphone, your workers will have the communications tools they need to work efficiently and productively.

This versatile IP phone delivers high quality voice via a USB-connected headset / handset. It provides the full functionality and features of a regular desktop phone. Designed to meet the needs of any employee, it can be used as a primary desktop telephone, a supplemental desktop telephone or a remote / telecommuting device.
